

Attention R.E.I.A. Members: Check out the benefits of using CybrCollect.

- NO cost to landlords.
- Eliminates bank returned check fees, and caps Federal Reserve forwarding cost at only \$2.
- Eliminates second and third bounce charges. Small value checks can be collected cost-effectively.
- Landlords are notified daily of checks in the recovery process.
- Collected funds are electronically deposited into landlord's account on a daily basis, with no waiting for a month-end settlement.
- Average time to collect NSF checks is only 6.2 days, with more than 80% collected and paid within 30 days.
- At banks, electronic items have priority over paper checks and are paid first, so landlords go to the head of the payment line.
- Improved collection results by as much as 50% over traditional collection methods, and as much as 25% over competitors who randomly re-present electronically.
- Reduces collection costs by eliminating internal manual process.
- Faster and more efficient than paper process.
- State-of-the-art web-based reporting is downloadable to Landlord's accounting software without re-keying data — easily reconcile bank accounts and recovery status.
- Executive Analysis Reporting tool allows the landlord to monitor the exact cost of check acceptance.
- Through a banking arrangement with the Federal Reserve, **electronic collection begins 5 to 7 days faster, and your bank can no longer charge you for returned check fees.** Competitors must wait for a check to be returned to your bank where you pay a returned check fee, and only then is the check forwarded for collection.
- Some competitors contract with an outside clearinghouse to electronically convert and re-present. This adds an additional 7 to 14 days to the collection process. **Statistics prove that the faster the collection process begins, the higher the success rate.**
- Our proprietary, web-based reporting is unequalled, leaving industry competitors scrambling to attempt duplication. **Collection status and information is provided in real time, reportable by date range, and is downloadable directly to your accounting software.** You don't even have to re-key data.
- **CybrCollect® leads the industry in customer service.** Our customers speak with real people, who answer questions and immediately address problems with a sense of urgency. Clients are never referred to multiple departments or multiple phone numbers.
